- Looks great in Yamaha Viper
- 30% brighter than stock
- Fits Pol, Doo, Yam, & some Cats
- Also great for older, lower amperage sleds
- packaged in pairs-new "Tuff Pak"

Headlight Caps & Rainbow Strobe

Glass headlight caps add a deep color to your headlight beam. Designed for show-only, these caps work great with stock or Brite-Lite H-4 bulbs. Fits most snowmobiles and motorcycles.

- Blue cap (BL-43BCAP)
- Green cap (BL-43GCAP)
- Yellow cap (BL-43YCAP)

The Rainbow Strobe is a glass prism H-4 insert with a metal cage that houses 3 pieces of glass that gives a full range of rainbow colors. It does not affect the performance of your headlight and works with stock or Brite-Lite bulbs. Fits most motorcycles and snowmobiles.

When it comes to lighting products, no one is more innovative than Brite-Lites by Bluhm Enterprises.

Brite-Lites understands safety and style. You want to look good without sacrificing safety or quality. We use only top-quality components in all our products. Plus, all Bluhm Enterprise products are tested for durability, fitment and safety.

We don't just do light, either. We also offer other innovative products that make you look better and ride safer.

Brite-Lites and Bluhm Enterprise products are available through many dealers and distributors. This brochure shows the wide array of products we offer, but for the latest additions to our product line, visit our website, www.britelites.net.

Tuff Pak
Twin packs of Brite-Lites are now available in a hard plastic container.

BRITE-LITES!

L.E.D. and other Products

NEW Accent L.E.D. Kit

Brite-Lites introduces their brand new Accent L.E.D. kits for cars, trucks, cycles, boats, ATVs, snowmobiles, trailers and more. These new lights can be applied for ground effects or extra lighting when and where you need it. Hook them up for interior lights in enclosed trailers or running lights on open deck trailers. Add them to the interior of your boat for night time safety. 3M Adhesive backing allows them to be placed almost anywhere. Works with any 12 volt electrical system with or without a battery! Brite-Lites Accent L.E.D.s produce no heat and are low power consuming. Each kit contains eight L.E.D. units with five hi-power L.E.D.s in each unit. All necessary wiring and fasteners are included. The L.E.D.s are molded into a hi-impact, waterproof plastic case and are available in several cool colors including red, green, blue, yellow or white.

Taillight L.E.D.

Cool new look, long lasting and simple installation. Fits into any standard 1156 or 1157 taillight or parking light socket. Works on any vehicle that has DC negative ground, but will not work on any vehicle without a battery or any vehicle with a positive ground electrical system. Great for motorcycles, show cars, customs and some snowmobiles.

Taillight L.E.D. bulbs for 1156 and 1157 sockets

- 1157 Rotating run/Pulsating brake light (BL-1157LEDP)
- 1157 Normal run/Normal brake light (BL-1157LED)
- 1156 Normal run RED lights (BL-1156RLED)
- 1156 Normal run AMBER lights (BL-1156ALED)

NEW 360° L.E.D.

Add an extra margin of safety and a cool new look to your ride with the new Brite-Lites 360 L.E.D.s. These little gems fit in almost any taillight; motorcycle, car, truck, snowmobile, ATV and more. They produce a super bright white light that is more visible than ordinary bulbs. The low power consumption means less stress on the vehicle's electrical system and a longer lasting light. The 360-degree dispersion means more visibility and a brighter light emission and they will function in any mounting position. Base options are round metal 1157 and 1156, and new flat push-in 3157 and 3156 styles. 360 L.E.D.s are shock and vibration resistant for long lasting use in harsh environments. Available in white, red and amber.

NEW Trailer L.E.D.s

The new Brite-Lites Trailer L.E.D. light is a simple and easy replacement light for all trailers. They produce a brighter light and run cooler than ordinary lights. Works on any 12-volt system.

*Runs cooler than standard bulbs
Uses less energy
Lasts longer and is more durable
Red, amber and white colors
Oval, round and rectangle shapes
Works with all 12-volt systems
Plug right in no splicing!
Update your entire trailer to current technology*

NEW Fog-Lites

High quality fog lights kits are made for extreme off-road use. Sizes and shapes available to fit most all needs from low profile under rack mount (BL-FLSQ1), to super thin round replacement lights (BL-FLR1), to the mega 9" eye ball burning Flame Thrower! (BL-FLR9). All Fog Light kits are 12 volt with halogen 55 watt H-3 type bulbs and accept any Brite Lite H-3 High power Xenon Gas bulb. The kits are sold as pairs and are complete with all necessary wire to hook up to your lighting system. For ATV's, motorcycles, snowmobiles, and automotive applications. Check our web site for additional Fog Light kits and optional bulbs.

BL-FLSQ1

BL-FLR9

H-4 Sealed Beam Conversion Kits

Quartz Iodine Lens and new crystal clear Diamond Lens Headlamp conversions replace stock sealed beam headlight housing to high-quality, replaceable bulb style headlights. Makes the headlight two to four times brighter than stock and allows for the use of colored or Hi-Power bulbs. Makes a noticeable difference to the look of your vehicle. Works on twin or quad headlight vehicles and cycles. Bulb sold separately.

- Rectangle 4"x6" Hi or Low beam (BL-43SQ46)
- Rectangle 6"x8" Hi and Low beam (BL43SQ68)
- Round 5-3/4" Hi or Low beam (BL-43R5)
- Round 7" Hi and Low beam (BL-43R7)

RAD Covers

- Yellow
- Deep Violet
- Rigel Blue
- Purple
- Bright Red
- Light Blue
- Teal Green
- Magenta
- White
- Black

Rad Covers come in ten HOT colors to match your sled. They protect the radius arms from scratches and dresses up worn or rusty radius arms. Adds a nice accent to your sled. Packaged in sets of four.

Neck PRO-tector

New design- Better fit!

Nylon Covered PRO style NEW design & shape

Econo style-foam rubber molded with shoulder straps

Blumh Enterprises is now offering a full line of Neck PRO-Tectors for added safety while riding. These NASCAR style neck protectors give you a full range of motion, while providing helmet support to reduce fatigue. If you are a racer or a hard-core rider or if you have had neck or back injuries or just want to ride safe, we have a neck protector for you. We have two sizes and two styles to choose from.
